

Robots deliver shopping

NHS workers in Milton Keynes are having their shopping delivered by robots! The NHS staff, who sometimes cannot visit the shops themselves due to the long hours that they are working, are now getting free deliveries from robots. The Starship Technologies food delivery robots can hold several bags of shopping and a crate of bottles. They travel on the pavements around the town at up to 4 miles per hour. Starship who have a fleet of 70 machines, have been operating in Milton Keynes since 2018, say that 100,000 autonomous deliveries have now been completed in the town. "Right now, we are offering free delivery to all NHS workers within the community. We want to make life a little bit easier for these people in these very, very stressful times," said Henry Harris-Burland of Starship.

Hubble Telescope stunning new birthday image

Pictured: The anniversary image, taken from Hubbles Twitter page, featuring the giant nebula NGC 2014 and its neighbour NGC 2020, part of a vast star-forming region in the Large Magellanic Cloud.

The Hubble telescope celebrated 30 years since it was launched by releasing an amazing image, the picture of nebulas NGC 2014 and NGC 2020 has been nicknamed the "Cosmic Reef" because it looks like an undersea world. Nebulas NGC 2014 and NGC 2020 are part of the Large Magellanic Cloud, a satellite galaxy of the Milky Way, around 163,000 light-years away. The giant telescope was sent into low Earth orbit in April 1990 to capture images and data of distant galaxies, planets and supermassive black holes, deep within our universe. The information gathered has been used to write thousands of scientific papers. You can see what the Hubble telescope saw on your birthday by adding your birth month and day at https://imagine.gsfc.nasa.gov/hst_bday/ you will then be shown the best photo captured on that date within the last three decades!

Showing support for key workers

Lots of people around the world are coming up with ways to show their appreciation, gratitude and respect for NHS staff and all key workers. Millions of us are taking part in the “clap for our carers” every Thursday at 8pm. Many people have created bright and colourful rainbow displays, thanking those who are working through lockdown. These messages of thanks have been written on the roads, shown at sports venues, painted on to stones, printed on sports kits and displayed in windows of homes, schools and businesses! Hanna, who is in Year 3 at Hythe Primary School, near Southampton, has written and performed a song about her frustrations over Coronavirus and how she wants key workers to keep safe. She sings the lyrics 'Key workers, key workers, key workers - keep safe!' to the tune of Dance Monkey by Tones and I.

Pictured: Hanna from Hythe Primary School, performing the song she wrote taken from her schools Twitter page.

Let us know if you are doing anything to show your support for key workers!

Your thoughts on the news...

My last test was a spelling test.

Test are very important because we need to check our learning every now and then so our teachers know how much we have learnt.

Isabel Horton - Age 9

I think tests aren't the only way to check your learning as you can sometimes get tested without knowing e.g. games like hit the button plus tests are boring, so you switch off and games are fun. So tests are good but games are normally better because you remember the mistakes.

George- Age 10

Yes and No because some are good at tests, but some are not good at tests and some people can't keep up with the speed.

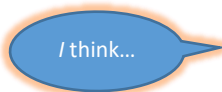

Lily-Anne - Age 10

I like spelling tests and I think most people in my class do so I think they are good.

Ben - Age 6
