

Message from Teachers

Hello year 6! Well, here we are. At the end of Year 6. The end of your primary school experience but the beginning of a new chapter in your life that is not yet written. Don't forget that you are the author of that next chapter; you can decide what person you will be in your own story – it's all up to you! So enjoy the adventure and reach for the stars because we think that you are all very special people. Good luck Class of 2020!

Spellings and times tables for the week

suggest	twelfth	temperature
symbol	variety	thorough
system	vegetable	yacht
	vehicle	

Keep practising your times tables daily up to 12 x 12 so you're ready for Y7 maths.

Maths

Starter activities:

We are going to practise converting measures this week.

Remember:

1cm = 10mm

1m = 100cm

1km = 1000m

1kg = 1000g

1l = 1000ml

Monday - <https://myminimaths.co.uk/year-6-week-12-converting-between-different-metric-units-of-measurement-monday/>

Tuesday - <https://myminimaths.co.uk/year-6-week-12-converting-between-different-metric-units-of-measurement-tuesday/>

Wednesday - <https://myminimaths.co.uk/year-6-week-12-converting-between-different-metric-units-of-measurement-wednesday/>

Thursday - <https://myminimaths.co.uk/year-6-week-12-converting-between-different-metric-units-of-measurement-thursday/>

Friday - <https://myminimaths.co.uk/year-6-week-12-converting-between-different-metric-units-of-measurement-friday/>

Main Activities:

This is our last week of problem solving.

Monday

Try this ice cream maths challenge.

The ice cream stall sells chocolate, peach, mint, lemon, strawberry and vanilla flavour.

What combinations can be created for a double cone?

Be sure to work systematically and record your solutions in an order. How will you know once you have found all the possibilities? Use the space below for your working out.

Tuesday

PROBLEM SOLVING

Davina's family have just opened an Italian restaurant. They have enough space for 72 diners.

Draw two possible floor plans, showing two different ways of how the tables might be arranged.

The fewest amount of people per table is 2.

The greatest amount of people per table is 8.

There must be a variety of table sizes in the restaurant.

Wednesday

Consecutive numbers are whole numbers that are next to each other, e.g. 6 and 7.

In each question, explain your answers as fully as possible, trying to show what patterns you have noticed and give reasons for the patterns.

Addition

Pick 2 consecutive numbers and add them together e.g. $12 + 13 = 25$ Repeat with other pairs of consecutive numbers.

What do you notice? What happens if you add 3 consecutive numbers?

Multiplication

Take pairs of consecutive numbers and multiply them together e.g. $6 \times 7 = 42$

What do you notice? ? What happens if you multiply 3 consecutive numbers?

Thursday

Heather is thinking of a five-digit number.

The number is greater than 33 000 and less than 34 000.

The digit in the hundreds column is the same as the digit in the units column.

All of the digits in the number are odd.

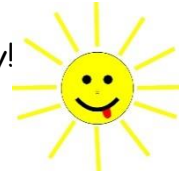

What could Heather's number be? List some possibilities.

Friday

Take the Friday challenge - <https://www.bbc.co.uk/bitesize/articles/zn8k3j6>

English

Weather forecast for this week: This week, it's going to be warm and funny!

For our last week, let's get silly!

MONDAY

Watch the video on YouTube. **Always tell a parent what you are watching and if there is anything that you see on the Internet that you don't like, let someone know.**

<https://www.literacyshedplus.com/en-gb/resource/high-flying-giraffes-9-11>

- Can you estimate the number of giraffes you have just watched? You can watch it again to see if you were correct!
- How many giraffes were acting as catchers and throwers?
- The giraffes were quite acrobatic. Why did the filmmaker choose giraffes? Did it have something to do with the way they move naturally?
- If you had to make a film and use different animals in five different sports, which would you choose? Think of the movement of the animal and the way athletics move in particular sports.

TUESDAY

Carpet-stain

Flumpy

Pippy
Longstocking

Pootle-head

Make a mini book of funny words just for fun! Try and say them without laughing. Follow the instructions to make the minibook:

<https://www.youtube.com/watch?v=C8xJ2UzaQYU>

Wednesday

Read these funny poems then have a go at one yourself.

Snowball

I made myself a snowball
As perfect as could be.
I thought I'd keep it as a pet
And let it sleep with me.
I made it some pyjamas
And a pillow for its head.
Then last night it ran away,
But first it wet the bed.
By Shel Silverstein

Ning Nang Nong

On the Ning Nang Nong
Where the Cows go Bong!
and the monkeys all say BOO!
There's a Nong Nang Ning
Where the trees go Ping!
And the tea pots jibber jabber joo.
On the Nong Ning Nang
All the mice go Clang
And you just can't catch 'em when
they do!
So its Ning Nang Nong
Cows go Bong!
Nong Nang Ning
Trees go ping
Nong Ning Nang
The mice go Clang
What a noisy place to belong
is the Ning Nang Ning Nang Nong!!

By Spike Milligan

Now We Are Six

When I was One,
I had just begun.
When I was Two,
I was nearly new.
When I was Three
I was hardly me.
When I was Four,
I was not much more.
When I was Five,
I was just alive.
But now I am Six,
I'm as clever as clever,
So I think I'll be six now for
ever and ever.

By A. A. Milne

Thursday

Check-out the Beano's joke generator here. Hundreds of jokes, bound to have you in stitches:

<https://www.beano.com/categories/jokes>

Have a go at writing your own jokes or memorising some of the ones from the Beano Generator. Now, perform your jokes to an audience.

See if you can get them laughing!

Friday

Even though it's warm outside, the thermostat at school still thinks it's WINTER. So the furnace is on full blast all day, which makes it hard to concentrate in class.

There are lots of funny stories out there to put a smile on your face and Dairy of a Wimpy Kid is one of the most popular comedy reads for children. Jeff Kinney manages to combine comic illustrations with a funny tale. Read an extract here, then see if you can think of a funny time in your life that you could write about in Kinney's style and illustrate with comic graphics.

Extra Activities

RE - Is God real?

Here are some sentence starters to help you answer this question.

Some people believe God is real because...

This is a strong/weak argument because...

Believing in God is very important for some people because

On the other hand

Some people believe that God is not real because...

This is a strong /weak argument because...

Believing that there is no God might affect how a person lives, for example...

Some people are quite happy for others to believe, even if they don't, because...

Many people who believe in God don't think you can actually prove God's existence but they say...

Conclusion

For atheists, the strongest evidence that there is no God seems to be...

Believing in God is a big part in millions of people's lives because...

Arguments don't always persuade people to believe or not to believe, because...

This is an important question to explore because...

I think... because...

Art - Make a fact file about British graffiti artist Banksy.

Transition Activities

My goals for year 7

Think about what you want to achieve in Year 7. Try to identify a goal in each of the key areas and record these on the chart below.

Friendship Goal	Education Goal
Leisure Goal	Health Goal
